Sprint 4 Review

Start date: 03.03.2025

End date: 14.03.2025

Sprint Duration: 2 weeks

Work hours: 20 h/week

Planned User Stories: 16

Total User Stories: 17

Completed User Stories: 17

Deferred: none

Scrum Master: Maria Aalto

Developers: Suphitcha Pitkänen, Ville Schulz

Release: note update and delete, notification implementation, improved search, image save to cloud, code refactoring

Challenges: time – the sprint was shorter than previously, so we struggled with the scheduled time, but managed in the end

Sprint 5 Planning

As a user, I want to select my preferred language from a dropdown menu so that I can view the interface in my native language.
- Language selection dropdown is visible and functional.
- Selected language is applied to the user interface without errors.
- Text elements update correctly according to the selected language.

As a developer, I want to plan and prepare the database for handling multilingual data so that it can store and retrieve data in multiple languages without issues.
- Plan and prepare the database for handling multilingual data.
- Create a strategy for managing character encoding and locale settings.

As a product manager, I want to update the product backlog to reflect localization requirements so that the team can track and manage localization tasks effectively.
- Update the product backlog to reflect localization requirements.
- Add new user stories, tasks, and acceptance criteria.

As a project manager, I want to identify essential resources, such as translators and content management systems, so that the localization process is efficient and well-supported.
- Identify essential resources, such as translators and content management system

As a scrum master, I want to finalize the sprint plan, detailing tasks and estimated story points for both user interface and database localization, so that the team has a clear roadmap for the sprint.
- Finalize the sprint plan, detailing tasks and estimated story points for both user interface and database localization.

For Sprint 5

Planned scrum master: Suphitcha Pitkänen

User stories aimed to implement: 14

Team's activities in each area of focus within the sprint 5 (18.3.2025 - 1.4.2025):

• User Interface Localization (Ville Schulz)

• Database Localization (Maria Aalto)

• Product Backlog Update (Suphitcha Pitkänen)

• Localization Resources Identification (Maria Aalto)

• Sprint Planning and Review (Suphitcha Pitkänen)
